NEW: MICRO-MINI and SUNBOUNCE FLASH-BRACKET

NEW: MICRO-MINI and SUNBOUNCE FLASH-BRACKET

Antje shoots Mallorcas „King of Tea“ Bernd Moser

MOST OF THE TIME I HAVE TO WORK ALONE. WHAT A RELIEF THE **MICRO MINI** IS! THE **MICRO MINI** IS SO STRONG AND GIVES ME PERFECT, STABLE LIGHT EVEN WHEN I HAVE TO HOLD IT MYSELF WHILE SHOOTING. AND THE WIND? IT IS NEVER A FACTOR. IF I HAVE TIME, I CAN ATTACH THE **MICRO-MINI** PERFECTLY TO A SMALL LIGHT-STAND. I HAVE NEVER BEEN ABLE TO HAVE SUCH A PROFESSIONAL LOOKING LIGHT SOURCE WITH MY TINY SYSTEM FLASH. SUN OR FLASH - I HAVE THE PERFECT LIGHT ENHANCER. THIS NEW SUNBOUNCE DESIGN TURNS MY GEAR INTO THE MOST INCREDIBLE VERSATILE **MICRO-MINI** TRAVELLING STUDIO.

NEW: SUNBOUNCE Flash-Bracket

- For use with the Micro MINI, MINI and PRO BOUNCE Systems
- Once again, California SUNBOUNCE introduces a new product that we think will change the landscape of reflective panels.
- We all know that the bigger the light source - the better the light looks on the subject. Why have a small pinpoint of light when you can have a wall of light, not unlike the sun? The light looks more natural, and covers your subject.
- Thus SUNBOUNCE has now made the perfect attachment for using your normally "on camera" strobe as a off camera light source.
- As many of today's strobes are wireless TTL or at least tethered TTL keeping them totally in sync with the camera is not a problem. Shown here is Olympus's newest wireless flash system attached to the SUNBOUNCE Flash-Bracket and then attached to the stand for a completely hands free TTL system that will give the user a big beautiful light source.
- The SUNBOUNCE Flash-Bracket clamps to the SUNBOUNCE frame and can then extend up to 24 inches for use with smaller or bigger SUN-BOUNCE panels.

MEASUREMENTS:

MICRO MINI 60x90 cm (2'x3') 550 grms

SUNBOUNCE Flash-Bracket ca. 35 cm, extendable to 60 cm for use on MINI or PRO

MICRO MINI
