- BH-34 Diameter: 34mm
- BH-34 Height: 93mm
- BH-34 Load Capacity: 15kg
- Weight BH-34: 340g
- Warranty: 6 years (the kit)

Genesis C3 Kit, which comes with the tripod and the ball-head, is a perfect choice for beginners and expert photographers. The kit is made of light and durable carbon fiber. Provides high quality craftsmanship and is made with utmost attention to detail. With its optimal framework and use of the best materials, the C3 Kit's maximum load of 15kg seems impressive in comparison to its small weight. Length of all 4 sections can be adjusted through special rings. Each section is separated by a sealing flange to prevent dirt, fine sand and dust or dampness from getting caught inside. C3's rubber feet increase the tripod's stability and prevent sliding even on smooth surfaces. The device's central column is also adjusted by the ring and fitted with a spring-loaded hook for suspension of an additional load stabilizing the tripod. The C3 kit comes with a useful functionality; one of its legs can be transformed into a practical monopod equipped with a wide foam insulated handle to ensure good grip and a thread to mount a film or photo head. The C3 model is marketed in a kit with a BH-34 ball-head. The ball-head is fitted with Arca-Swiss mount with a lock preventing from the accidental plate release, a panoramic base with the rotational scale, a knob adjusting the ball's movements and a spirit level. Each of the Genesis BASE ball-heads has a 3/8” tripod thread.

The offered kit includes: C3 tripod, BH-34 Ball-Head, Case, Allen Wrench
