

Quadralite RGB SmartStick 20

LED Tube light

Quadralite RGB SmartStick 20 is a LED light, often also called a lightsaber or light wand. This LED light has an adjustable color temperature between 2800K and 8000K. On top of that, it can produce millions of colors thanks to CCT and HSI modes. SmartStick 20 has a power output of 20W. Thanks to easy controls, the light can be easily dimmed and the built-in battery allows for use outdoors without any power source.

SmartStick 20 can be used in full RGB spectrum allowing for easy achievement of multiple special effects without using any additional gels. Thanks to CCT or HSI modes, you can fine-tune the desired color. GEL mode allows for a choice of predefined gel colors (blue, orange, straw, cyan, green, yellow, red, magenta, pink, lavender).

There are also 10 available special effects: 1. RGB wheel, 2. Lightning, 3. Police, 4. Paparazzi, 5. A broken fluorescent lamp, 6. Fireworks, 7. Pulse, 8. Explosion, 9. TV, 10. Fire.

Quadralite SmartStick 20 can also work in conjunction with other lamps (up to 99), both in Slave and Master mode, in 99 different groups. The lamp can be controlled from the built-in panel or the dedicated Quadralite mobile app. This significantly increases the convenience and speed of use, making it easier to adjust the lighting in real-time. In the app, you will have the ability to control the color temperature, HSL, as well as a selection of 48 practical color filters and many effect modes, with more personal settings than from the panel on the lamp. The application allows you to simultaneously control multiple Quadralite lamps at the same time.

The lamp has a 1/4 "tripod mount at the bottom, allowing it to be mounted on a lighting or photographic stand, making the work on the set even easier.

SmartStick Quadralite is designed for creative use in photography and film. It allows you to achieve many different effects using only one device. This reduces the amount of equipment needed, and also allows the implementation of many creative ideas. It has many modes useful for video productions. The ability to combine it with other lamps and lightsabers can give surprising and very interesting results.

Thanks to the characteristic shape and low weight, the use of lightsabers is very convenient and it isn't limited only to working in the studio. Thanks to the built-in rechargeable battery with a capacity of 2600 mAh, lamps of this type are ready to work regardless of the power source available. Their transport and outdoor use are therefore super easy. This type of lighting is also very popular with vloggers, also due to the ease of its control.

Features:

- model: Quadralite RGB SmartStick20,
- maximum power: 20W,
- color temperature: 2800K-8000K,
- CRI: 95,
- TLCI: 95,
- control: by application, by the panel on the lamp,
- lux at 1m: 580,
- smooth power regulation in the range from 0-100%.

Set contains:

- Quadralite RGB SmartStick 20,
- user manual,
- charger,
- carrying case.

**Specification:**

Model	Quadralite RGB SmartStick 20		
Luminous surface	52*0.5W RGB LED 192*0.2W W/Y LED		
Maximum power	20W		
Color temperature	2800-8000K		
Lux at 1m	580		
CRI	95%		
TLCI	95%		
RGB Lux at 1m	R: 212	G: 410	B:80
Wireless range	>10M		
Mode buttons	CCT HSI GEL EFX SET		
Master-Slave mode	Yes		
Mobile application	Yes		
Power supply	2600mAh/16.8V Built-in battery		
Dimensions	50*582mm		
Weight	600g
