

Quadralite VideoLED 1500

Quadralite VideoLED 1500 is an extension of the lamp family VideoLED, large 150W of power, allows you to work in both amateur and professional conditions. The whole series combines the advantages of LED-based lighting and universal Bowens mounting. This combination allows you to use a wide range of light modifiers. Thanks to these features, it can be used both in photography and on film sets.

The use of LED technology means that the lamp guarantees a stable stream of light of high intensity (31700lx at a distance of 1m), characterized by a high color reproduction coefficient ($Ra \geq 95$) and color temperature adapted to sunlight ($5400K \pm 100K$). VideoLED 1500 thanks to the low operating temperature, can be used with all types of accessories commonly used in photo studios, such as: streams, gates, bowls, softboxes and umbrellas. In addition, the lamp is very efficient and needs only a fraction of the energy that is absorbed by an equivalent halogen of the same brightness. Cooling of the lamp components is provided by a large heatsink and a low-speed fan, whose quiet operation does not interfere with the recording of sounds during filming. One of the characteristic features is the service life of the LED used in the lamp, which reaches 50,000h, which is the equivalent of over 5.5 years of uninterrupted operation.

VideoLED 1500 can be a great addition to the photographer's studio equipment and will allow you to expand the offer with professional video productions.

High power and versatility are the basic features of this product. They allow you to create professional film and photographic productions.

What we will find in the set:

- Quadralite VideoLED 1500 light,
- power cord,
- burner lid,
- manual,
- reflector 18cm.

**Key features of the product:**

- LED with a power of 150W,
- high colour rendering index $Ra \geq 95$,
- color temperature 5400K ($\pm 100K$),
- smooth brightness adjustment in the range of 10-100%,
- built-in silent cooling fan,
- Bowens accessories mounting,
- solid metal housing,

Specifications:

Name:	Quadralite VideoLED 1500	
Type:	Studio Continuous Light Lamp	
Light source:	LED	
Power:	150W	
Photometry*:		
• 1,0m without reflector	31700lx	
• 1,0m with reflector	5790lx	
Color temperature	5400K($\pm 100K$)	
Angle of light flux:	60°	
Brightness adjustment:	Smooth, 10-100%	

Cooling:	Passive (radiator) and active (silent fan)
Fuse:	10A
Power input:	200~240V 50Hz
Dimensions**:	420 x 220 x 130 mm
Weight:	2,4 kg
EAN:	5901698720360

* - measurement made with a 18 cm standard reflector mounted and full lamp power.
