

Genesis Gear PVC Photography Backdrop

Genesis Gear PVC backdrop is an ideal product for every photographer and filmmaker. It will find its application especially in portrait and product photography, as well as in film projects.

The background is made of high-quality PVC material which is crease-resistant, non-transparent, and does not cause glare or reflections. In case of dirt, it is enough to wipe it with a damp cloth. PVC backdrops are extremely durable and easy to use, unlike cardboard or fabric backdrops. The product is available in different sizes and colors.
