

Irix Edge CPL SR 86mm

Product Series: Irix Edge
 Product Name: Irix Edge CPL SR 86mm
 Code: IFE-CPL-86-SR
 Size: 86mm
 EAN: 7640172191941

Irix Edge CPL SR 86mm
 [IFE-CPL-86-SR]

7 640172 191941 >

	Highest quality optical glass ensures exceptional image sharpness.
	5-year filter coating warranty.
	Super Resistant (SR) - SR series filters are characterized by their high resistance to mechanical damage and increased resistance to internal stress (compression).
	Double-sided, multi-layered anti-reflective coatings guarantee high image contrast, free from flares and reflections
	NANO coating that repels dirt, making it easier to keep the filter clean
	Lightweight and durable low-profile frame made of aircraft-grade aluminum.

Specifications

Filter Type	Circular Polariser
Thread Size	86mm
Frame Material	Aviation Aluminum
Frame Thickness (not incl. thread)	5 mm
Anti-reflective Coatings	Double-sided and multi-layered
Special Coatings	NANO - repels dirt

Irix Edge CPL SR

ELIMINATES REFLECTIONS - RICH COLORS - SUPERIOR PROTECTION

The **Irix Edge CPL SR** polarizing filter is the most basic filter for any photographer - it achieves effects that are impossible to reproduce in post-production, such as the reduction and elimination of reflections on shiny surfaces, a deep blue sky color, and a more three-dimensional cloud structure.

Super Resistant (SR) is a series of Irix Edge filters that give you the confidence to protect your lens while shooting. SR filters are characterized by excellent resistance to mechanical damage such as impacts and increased scratch resistance. These features, combined with NANO coatings (dirt-repelling), give you the certainty of trouble-free use for many years to come.

Stunning effects even before taking a photo

Water

The **Irix Edge CPL SR** filter eliminates reflections from the surface of water, meaning we end up with perfectly clear water.

Glass and Metal

Adjusting the polarization allows you to cut off the reflections from the surface of glass, making them perfectly transparent.

Polarization gives metal objects their deep, natural colors.

Plants

All plants, from grasses to trees, reflect light off green surfaces. Thanks to the polarization effect, the plants gain a beautiful and healthy color.

Improving the color of the Sky

A key feature of the **Irix Edge CPL SR** (which is consistently used by landscape photographers) is its ability to enhance the appearance of the sky and clouds. The sky is given a deep blue hue and the clouds have an accentuated three-dimensional structure.

Adjustable degree of polarization

The build of the **Irix Edge CPL SR** filter consists of two separate circular frames, in addition to the glass surface. They allow for comfortable and smooth adjustment, which changes the degree of polarization so as to best match the desired effect of the photographer.
