

[Irix]

Irix Cine 21mm T1.5

Key Features

- Unique, Irix cinematic image for full-frame
- Weather sealed
- Fast T1.5 aperture
- Very low focus breathing
- Compact and lightweight
- Compatible with other Irix lenses
- Almost no distortion
- 7 mounts, including mirrorless

The “Irix Look”

Cine lenses are designed to provide substance. They are supposed to have that “special look”, an unidentified special thing that makes the movie stand out. Irix lenses come with their own cinematic look, the “Irix look”.

Round-shaped blades and a shallow depth of field will cut your subject out from the background. The unique bokeh draws the contours of your subject to make them stand out. The soft highlights and subtle mist will smooth out those light streaks that show up on other lenses, providing stunning footage in every frame.

Catch every moment

The 21mm lens gives freedom to your creativity. It's wide, but not wide enough to cause distortion. With this focal length, all proportions are kept and your subject will look exactly like you see them compared to wider lenses. With those characteristics, the lens works great for tight spaces, where we need to shoot, for example, people.

Whether cruising with your gimbal between dancing people during a wedding or shooting an action scene, where we want to get really close, the image will look like many more narrow lenses. Getting this close was for example in the movie Revenant. There DOP Emmanuel Lubezki was able to get really dynamic shots and make the viewer feel like they are right there with the actors thanks to lenses of similar focal lengths as 21mm.

The fast T1.5 opens up unlimited possibilities to shoot in any light conditions without going too high on your ISO, also providing a bokeh that will stand out and the weather sealing protects the lens in any weather conditions.

The T1.5 set

This 21mm will be our widest lens matching the 30mm and 45mm with T1.5, allowing for consistent shooting on a wide-open aperture. With such a wide lens, you can achieve amazing bokeh and easily match color, contrast, and brightness with the 30mm and 45mm.

The standard

All Irix cine lenses are designed with unified standards. Similar weights, 86mm front filter thread on most lenses, and same location of focus and iris gears. The signature Magnetic Mount System allows for easy mounting of the Irix Edge MMS filters on the 15mm, 30mm, 45mm, and 150mm lenses.

Available mounts

Canon RF | Canon EF | Sony E | Nikon Z | L-mount | Arri PL | MFT

Technical specification:

Sensor coverage		>full frame (43.3 mm)
Focal length		21 mm
Aperture range (T)		T1.5 ~ T16
Number of iris blades		11 (rounded shape)
Minimum focusing distance		0,3 m (11.81")
Focus ring	rotation angle	180°
	gear pitch	0.8 M
	number of teeth	117
	distance scale	Metric or imperial
Aperture ring	rotation angle	75°
	gear pitch	0.8 M
	number of teeth	110
Viewing angle (horizontal)	Full Frame	79,4°
	S-35mm 1.39x	65,6°
	APS-C 1.53x	57°
	APS-C 1.62x	54°
	MFT 2.0x	43,2°
Front filter thread		N/A
Weather sealing		4 rubber o-rings (PL 3 rubber o-rings)

Front diameter		95 mm
Markings		laser engraved, UV reactive
Dimensions (L x D) (without accessories)	Canon RF	124 x 95 mm
	Nikon Z	129 x 95 mm
	L-mount	125 x 95 mm
	Canon EF	101 x 95 mm
	Sony E	127 x 95 mm
	Arri PL mount	93 x 95 mm
	MFT mount	126 x 95 mm
Weight	Canon RF	1211g
	Nikon Z	1229g
	L-mount	1209g
	Canon EF – mount	1109g
	Sony E mount	1179g
	Arri PL mount	1105g
	MFT mount	1054g
Included accessories	Rear lens cap	1 pc
	Lens support foot 1/4"	1 pc
