

Irix **Cine** Production set

- **Top-quality** set of **Irix Cine** lenses.
- 15mm, 21mm, 30mm, 45mm, 150mm.
- Perfect for any commercial work.
- Cinematic “**Irix look**”.
- Standardized lenses to make your **set work easier**.
- Same **color, contrast, and sharpness**.
- **Nanuk** well-known quality case.
- **Waterproof** (IPX7), **dustproof** (IP6X) & MIL-SPEC certified.
- Specially designed for **Irix Cine** lenses with a slot for filters.

The production set: 15mm, 21mm, 30mm, 45mm, 150mm

The production set will allow you to easily start working on any film set. These 5 lenses are the core standard of any production. From establishing shots to extreme close-ups. Each lens matches with another providing a consistent look across the whole range that not only stands out but also makes your post-production much easier. While preserving details and colors, it will give you this almost vintage look, with unique bokeh.

15mm is a perfect lens for a wide shot. With the possibility to attach filters on such a wide lens, it is a great choice for any landscape or city shot.

21mm will be your go-to lens for any opening shot. This wide distortion-free lens will catch everything. A 21mm lens is also a great choice for any tight locations, where shooting from distance is not possible. Like events or weddings. With T1.5 this wide lens can cut out the background, producing beautiful bokeh.

30mm is a perfect medium shot lens. Either when trying to catch more of your interviewed person, leave some extra space around, or catch some b-roll it will perform great. On a crop sensor, it becomes closer to 45mm, which makes it a perfect portrait lens.

45mm lens is a favorite of current Irix users. A prime example of "Irix look". With T1.5 shoot in any light conditions. Sharp across the whole range allows you to capture those beauty shots while wide open. Add an ND filter and get beautiful shots, that will stand out even in daylight.

150mm designed for macro work allows for unmatched shots. Either food, product shots, or nature, 150mm can do it all. Amazing detail preservation, will wow your clients or audience.

The set comes with 3 basic filters that will allow you to start shooting in any condition. Each with Magnetic Mount System for quick workflow and SR rated to protect your lens. Being scratch-resistant.

Irix Edge UV filter - neutral filter, that will protect your lens.

Irix Edge CPL filter - useful to control reflections on sunny days

Irix Edge ND8 filter - will cut $\frac{1}{8}$ of the light reaching the sensor. Thanks to that, you can keep the iris opened up even during the bright day.

Irix Edge Round Filters Case - to keep them secured

Irix lenses are designed to complement each other when working in the set. Each has the same distances of focus and iris gears to make swapping them much easier. Similar weight and size help to avoid rebalancing tripod, steadicam or gimbal. **Irix** lens optics are designed to provide the same picture. Preserving contrast, color, and sharpness across the whole set. When in need to add filters, most lenses come with 86mm filter thread and 95mm front diameter.

Irix lenses are weatherproofed to let you on work no matter what conditions you will approach. Each is sealed to keep the dust, sand, or water out. Making your camera only limitation, on where and when you can shoot.

With the expansion of the **Irix Cine set**, Nanuk was a perfect fit for a case that can keep up with the lenses. Their cases are well known around the world as very durable and tough.

Whole set including the case weighs around 9 kg.

Technical data

Product name	Irix Cine Production set
Lens set	15mm. 21mm, 30mm, 45mm, 150mm
Filters set	UV, CPL, ND8
Weight	9kg
Case Dimension	429 x 328 x 236 mm
