Mounting points on slider:	7x female thread 1/4" 1x female thread 3/8"
Max. load	13.5kg
Material:	aluminium
Min/max height:	68/85mm
Dimensions:	1250x155mm
Weight:	2100g

PRODUCT DESCRIPTION:

Genesis B-Slide PRO 150 is a slider with a length of 100cm designed for heavier cameras and camcorders. Its maximum load capacity is up to 13.5kg. Characteristic feature of this slider is wide, 50mm rail, on which the platform is moved. It increases stability and smoothness of movement which positively affects the quality of a recorded video. Slider can be used in an inverted position.

Mounting platform moves along the rail with ball bearing and allows you to mount heads and additional accessories.

Genesis B-Slide PRO 150 can be mounted to tripods as the guide is equipped with suitable mounting threads. Position and height of legs of slider can be regulated easily which enables leveling of the platform. Legs can also be folded, which makes the transportation easy.

Genesis B-Slide PRO 150 is entirely made of aluminum, which guarantees high quality, rigidity and durability of the construction.
