

Genesis B-Slide Skater 60

Genesis B-slide Skater 60 is a slider with a length of 60cm, additionally mounted on wheels. The movement of the trolley on the rail is based on sliding inserts. Slider allows smooth running of a camera or a camera equipped with a video function. The result of working with the slider are professional video staff with a dynamic course. Slider was built from aluminum alloys in combination with industrial plastics. Slider wheels have the option of converting into standard legs to ensure stable position of the whole set. The axles of the wheels can be mounted at different angles, allowing you to ride on the curve. Slider can also be mounted on typical tripods to record material at any specified height.
