

GENESIS M-BOX

Specification:

- Mounting points: a rail holder with a diameter of 15mm
- Material: aluminum / ABS
- Dimensions (without a gate) 253x184x69mm
- Weight of the set: 970g

Genesis M-BOX is a system of sunshades, dedicated to DSLR cameras and cameras, which can be mounted on rails with a diameter of 15mm. It perfectly matches the Genesis Cine VSS rig and assembly platform Genesis Uni Baseplate. Genesis M-BOX's task is to block the side access of light to the lens, which can cause flares, glare and a drop in contrast on the image recorded by the camera. The position of the gate can be adjusted and adapted to the lighting conditions and the angle of view of the lens or, if necessary, disassembled. Genesis M-BOX has a holder for filters with dimensions of 4x4 "Genesis M-BOX is made of aluminum and high-quality plastic, thanks to which the product is characterized by low weight while maintaining high durability.
