

Genesis MFC Follow Focus

Specification:

Mounting points: 1 rail holder 15mm

Material: aluminum

Length: 135mm

Height / width: 85mm

Weight: 370g

Genesis MFC Follow Focus is a small and light follow focus designed for users of SLR cameras and cameras using Samyang 14mm lenses. It can be adapted to most lenses, both long-angle and wide-angle thanks to the possibility of changing the position of the gear. The ring for focusing has a white-coated collar with magnets on which the focus points can be applied. The Genesis MFC Follow Focus uses a gear with a toothed wheel that allows for precise control of the lens rings. The set includes a toothed belt with a lock, which is mounted on the lens in case it is not prepared for cooperation with the toothed wheels. Genesis MFC Follow Focus is almost entirely made of aluminum elements which guarantees high durability, durability and precise work. Genesis MFC Follow Focus is designed so that it can be used with any accessory mounting system using 15mm rails.

The set sold includes:

- Genesis MFC Follow Focus
- Toothed belt
- Allen key
