MPC-3 Specification

- Number of Sections: 4
- Leg Diameter: 28mm
- Maximum Height: 166cm
- Minimum Height: 52.8cm
- Weight: 300 g
- Maximum Load: 20kg
- Color: Black
- Warranty: 6 years

Genesis MPC-3 monopod is entirely made of carbon fiber. As a result, the monopod combines such properties as: low weight, resistance to mechanical damages and long service life. Genesis MPC-3 can be unfolded to the maximum height of 166 cm. Maximum allowed load is approx. 20 kg.

The monopod is equipped with a wide foam insulated handle to ensure good grip, and a standard 3/8" thread allowing for a film or photo head to be mounted. Length of all 4 sections is adjusted with the use of special rings. Each section is separated by a sealing flange to prevent dirt, fine sand and dust or dampness from getting caught inside. The device's foot ends with a special spike increasing the monopod's stability. Bolt head is secured with a rubber attachment that may be also used as a stabilizing tool on slippery surfaces.
