

Genesis PLA - 200 Plate

PLA-200 Specification

- Mount: Arca-Swiss
- Length: 200mm
- Thickness: 10mm
- Width: 38mm
- Warranty: 6 years

A universal quick release plate of Arca-Swiss type designed for use with different camera models. Entirely made of aluminum alloy treated with the use of CNC technology and finished during anodizing process. The plate comes with two 1/4" bolts allowing to mount an additional accessory beside or behind a camera, and to ensure stable mount of your telephoto lens with a long shoe. Additionally, the device comes with anti-slip rubbers and bolts protecting against the fall out from the mount. A female 3/8" thread is located in the middle of the plate, allowing to screw the plate directly onto the tripod.
