EAN: 5901698703295

Genesis SK-GTX Slider HD Circle allows you to record eye-catching shots thanks to the rounded shape of the guide. The total length of the path on which the platform moves is 131cm. The legs of the slider allow you to adjust your length so that it is possible to perfectly level the position of the guide. Genesis SK-GTX Slider HD Circle is made entirely of aluminum, which ensures low mass of the set while maintaining high mechanical strength and stability of the structure. It is possible to combine two models of this slider and create a guide with the shape of a circle.
