

Genesis Tacit M

Genesis Tacit M is a sleek, pouch-style bag that fits your small DSLR or mirrorless camera with a kit lens, 8-inch tablet and some small accessories.

Unique design is the most striking feature of Genesis Tacit M. Bag style and its material are a far cry from most of the photographic bags available on the market. Carrying your photo gear in the Genesis Tacit M is much safer, since the bag does not attract unwanted attention of other people.

Tacit M can contain small, amateur DSLR with a standard lens and additional accessories. Its large capacity allows for easy storage of a mirrorless camera, e.g. Sony a7 or Fujifilm XT-1, with a set of up to two lenses. The bag is also fitted with a compartment intended for storing tablets (up to 8").

Flat Velcro-fastened chamber and a pocket with an organizer for small items, such as pens or memory cards, is located under the lid protecting the photo compartment. Both side walls of Genesis Tacit M bags feature flat pockets, which are perfect for storing lens caps or cable releases.

Product features:

- discreet, casual design and durable polyester material with unique canvas texture
- enhanced access to your gear through a Velcro-fastened lid
- tablet compartment (up to 8").
- flat, internal pocket located under the lapel, fastened with an additional Velcro
- pocket with an organizer for hand-held items and discreet pocket on the back of the bag
- comfortable shoulder strap with length adjustment and removable shoulder pad
- padded walls and bottom of the bag
