

Genesis USB Follow Focus

Genesis USB Follow Focus is a device for smooth change of focus when shooting a DSLR. Thanks to it, it is possible to adjust the depth of field and achieve professional photo effects. Genesis USB Follow Focus is equipped with a switch and a USB port on the sides. It is connected to the camera in a simple way with a USB cable included in the set. The compact size also has buttons for focusing and focal length as well as changing the speed of the auto-focus function. The knob on the top of the device can also control the above functions, and trigger the shutter button, which follows by pressing the knob. Genesis USB Follow Focus easily adapts to the preferences of the user, because you can control its functions with both buttons and a dial.

The device is compatible with the following cameras:

Canon EOS 5D Mark II
Canon EOS 1D Mark IV
Canon EOS 7D Canon EOS 60D
Canon EOS 600D / Rebel T3i / Kiss X5
Canon EOS 550D / Rebel T2i / Kiss X4
Canon 500D / Rebel T1i / Kiss X3
