

Irix **Cine Entry** set

- **Top-quality** set of **Irix Cine** lenses.
- **T1.5** set allowing anyone to get into film production.
- Standardized lenses to make your **set work easier**.
- Same **color, contrast, and sharpness**.
- **Nanuk** well-known quality case.
- Specially designed for **Irix Cine** lenses.
- Space for filters.
- **Waterproof** (IPX7), **dustproof** (IP6X) & MIL-SPEC certified.

The entry set: 21mm, 30mm, 45mm

Irix T1.5 set. This set will allow you to start shooting ASAP. Three most common focal lengths, that will perform great both on full-frame sensors as well as a crop like Super35. Being a fast T1.5 set, it will allow shooting in any light conditions. Each lens is spaced by 20 degrees of field of view. Thanks to that, they work great together covering perfectly the range from ~80 degrees to ~40.

21mm will be your go-to lens for any opening shot. This wide distortion-free lens will catch everything. A 21mm lens is also a great choice for any tight locations, where shooting from distance is not possible. Like events or weddings. With T1.5 this wide lens can cut out the background, producing beautiful bokeh.

30mm is a perfect medium shot lens. Either when trying to catch more of your interviewed person, leave some extra space around, or catch some b-roll it will perform great. On a crop sensor, it becomes closer to 45mm, which makes it a perfect portrait lens.

45mm lens is a favorite of current Irix users. A prime example of "Irix look". With T1.5 shoot in any light conditions. Sharp across the whole range allows you to capture those beauty shots while wide open. Add an ND filter and get beautiful shots, that will stand out even in daylight.

The set comes with 3 basic filters that will allow you to start shooting in any condition. Each with Magnetic Mount System for quick workflow and SR rated to protect your lens. Being scratch-resistant.

Irix Edge UV filter - neutral filter, that will protect your lens.

Irix Edge CPL filter - useful to control reflections on sunny days

Irix Edge ND16 filter - will cut 4 f-stops of the light reaching the sensor. Thanks to that, you can keep the iris opened up even during the bright day.

Irix Edge Round Filters Case - to keep them secured

Irix lenses are designed to complement each other when working in the set. Each has the same distances of focus and iris gears to make swapping them much easier. Similar weight and size help to avoid rebalancing tripod, steadicam or gimbal. **Irix** lens optics are designed to provide the same picture. Preserving contrast, color, and

sharpness across the whole set. When in need to add filters, most lenses come with 86mm filter thread and 95mm front diameter.

Irix lenses are weatherproofed to let you on work no matter what conditions you will approach. Each is sealed to keep the dust, sand, or water out. Making your camera only limitation, on where and when you can shoot.

With the expansion of the **Irix Cine set**, Nanuk was a perfect fit for a case that can keep up with the lenses. Their cases are well known around the world as very durable and tough.

Whole set including the case weighs around 6.5 kg.

Technical data

Product name	Irix Cine Entry set
Lens set	21mm, 30mm, 45mm
Filters Set	UV, CPL, ND16
Weight	6,5kg
Case dimensions	429 x 328 x 236 mm
