

21 T1.5
MM

Irix Cine 21mm T1.5 is a full-frame cine lens. It is excellent for any work where you will require a wide and fast lens.

KEY FEATURES

- Ultra HD 8K ready optics with superb image resolution
- Ultra wide-angle field of view
- Weather-sealed construction
- Almost no distortion
- Very low focus breathing
- 7 mounts, including mirrorless
- 9 aperture blades
- Weather sealed
- Laser UV reactive markings
- Magnetic mount system
- Standardised 0.8 pitch mod gears
- Internal focusing

DESCRIPTION

The "Irix Look"

Cine lenses are designed to provide the substance. They are supposed to have that "special look, unidentified special thing, that makes the movie stand out. Irix lenses come with their own cinematic look, the "Irix look".

Round shaped blade, and shallow depth of field, will cut your subject from the background. The unique bokeh draws the contours of your subject to make them stand out. The soft highlights and subtle mist will smooth out those light streaks, that show up on other lenses, providing footage that will be stunning in every frame.

Prepared for any environment

Rain or shine. The rugged and durable construction of the Irix Cine 21mm guarantees that you can keep on working with whatever weather throws at you. The lens is resistant to rain, sand, and dust. So you can take it for your next adventure in a desert or jungle if your camera can handle those environments. Engraved markings on the lens have been filled with UV-reactive paint, thanks to which filming in difficult lighting conditions becomes much easier.

Catch every moment

The 21mm lens gives freedom to your creativity. It's wide, but not wide enough to cause distortion. With this focal length, all proportions are kept and your subject will look exactly like you see them compared to wider lenses. With those characteristics, the lens works great for tight spaces, where we need to shoot, for example, people.

Whether cruising with your gimbal between dancing people during a wedding or shooting an action scene, where we want to get really close, the image will look like many more narrow lenses. Getting this close was for example in the movie Revenant. There DOP Emmanuel Lubezki was able to get really dynamic shots and make the viewer feel like they are right there with the actors thanks to lenses of similar focal lengths as 21mm.

The fast T1.5 opens up unlimited possibilities to shoot in any light conditions without going too high on your ISO, also providing a bokeh that will stand out and the weather sealing protects the lens in any weather conditions.

The T1.5 set

21mm will be our widest lens, that matches the 30 and 45mm with T1.5, allowing for consistent shooting on a wide-open aperture. With such a wide lens you can achieve amazing bokeh, and easily match all the colors, contrast, and brightness with 30mm and 45mm.

The standard

All Irix cine lenses are designed with unified standards. Similar weights, 86mm front filter thread on most lenses, and same location of focus and iris gears. The signature Magnetic Mount System allows for easy mounting of the Irix Edge MMS filters on the 15mm, 30mm, 45mm, and 150mm lenses.

Modern optics guarantee outstanding image quality

Creativity and passion lie in your individuality. Craft one-of-a-kind cinematic look that won't be easily forgotten! Thanks to the perfectly refined optical system, your shots will come out with low level of distortions and aberrations.

The internal focusing system of the lens guarantees incredible sharpness. 11 - blade iris provide beautiful bokeh and a very smooth adjustment between T1.5 and T1.6.

With very low focus breathing and close to human field of view Irix 21mm Cine is a perfect lens for filming natural-looking scenes. Allow yourself to enjoy every moment of filming!

Innovative adaptive ring

The adaptive ring is an innovative function which you will love no matter if you are a pro or an amateur.

The ring has been designed to keep the lens housing sleek and user-friendly when operated manually, but without any compromises when you want to use your favourite cine gear. Combining compatibility and usability that have never met before!

Lightweight and compact design

Irix cine 21mm T1.5 meets requirements of all filmmakers. No matter if you like to build professional setup or shoot with bare lens on stabilizer this lens is for you. Aluminum and magnesium alloy construction and housing weight only 1,1-1,2kg.

New and improved lens cover

We have listened to requests from our customers and decided to redesign our lens cover. The previous one didn't allow for leaving the lens standing on it. The improved one has a flat top and slides on the lens. Thanks to this, you can now leave the lens upside down on a table and not worry about it wobbling!

Irix and gimbals work great together

All Irix has a similar weight, which makes swapping them on gimbal much easier. Additionally, focus gears help with any wireless follow focus. The weight of around 1kg works as a perfect counterweight to most mirrorless cameras, making balancing a breeze. We have tested it personally on many gimbals from most popular brands like Zhiyun or DJI and were very happy with how it all performed together. *Each camera has different weight distribution and size, some balance easier, others don't. Tests were done on the Sony A7 series and Canon R series.

Perfectly fits into the cine world

Convenience and compatibility matters. We made sure our Irix Cine 15mm is compatible with most follow focus systems, matte boxes, stabilizers, and accessories available on the market.

In addition, it comes with a detachable lens support foot, which provides stabilization and reduces the strain on the camera mount when in use with follow focus gears.

Irix Cine is so universal it will become your favourite lens no matter the task!

Available mounts

The Irix 21mm T1.5 is available in Canon RF, Canon EF, Sony E, Nikon Z, L-mount, Fuji X, Arri PL and MFT mounts.

TECHNICAL
DATA

Image format	>43.3 mm "full frame"
Focal length	21 mm
Aperture range	T1.5 ~ T16
Number of iris blades	11 (rounded shape)
Minimal focusing distance	0.3 m (11.81")

Focus ring	
• rotation angle	180°
• gear pitch	0.8 m
• number of teeth	117
• distance scale	metric or imperial

Aperture ring	
• rotation angle	75°
• gear pitch	0.8 m
• number of teeth	110

Viewing angle (horizontal)	
• Full Frame	79.4°
• S-35mm 1.39x	65.6°
• APS-C 1.53x	57°
• APS-C 1.62x	54°
• MFT 2.0x	43.2°

Filter diameter	Not applicable
Weather sealing	4 rubber o-rings (PL 3 rubber o-rings)
Front diameter	95 mm
Markings	laser engraved, UV reactive

ACCESSORIES
INCLUDED

- Front cap
- Rear cap
- Lens support foot 1/4"

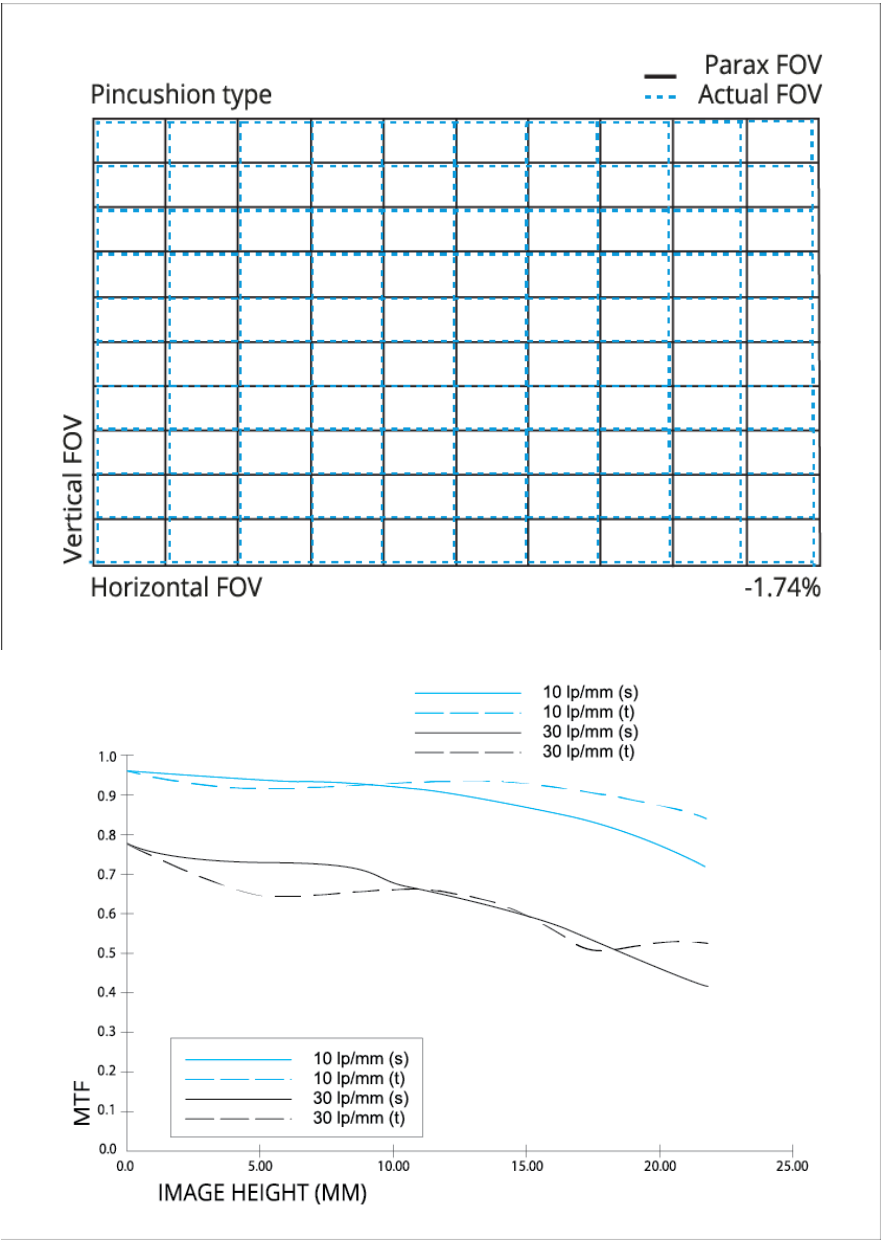

DIMENSIONS*

• Canon EF	101 x 95 mm
• Canon RF	124 x 95 mm
• Sony E	127 x 95 mm
• Arri PL	93 x 95 mm
• MFT	126 x 95 mm
• L mount	125 x 95 mm
• Nikon Z	129 x 95 mm
• Fuji X	133 x 95 mm

WEIGHT*

• Canon EF	1109 g
• Canon RF	1211 g
• Sony E	1179 g
• Arri PL	1105 g
• MFT	1054 g
• L mount	1209 g
• Nikon Z	1229 g
• Fuji X	1150 g

*a lens without accessories
