

New Irix Cine lens **front cap**

Improved design | dedicated for Irix lenses

Better Organization

New **Irix lens caps** were designed to fit **95 mm diameter Irix Cine lenses**. This allows you to keep your lens case **neat and organized**. They come fitted for each lens with visible markings on top. Thanks to that solution you will know exactly what lens you are reaching for after opening the case.

A practical solution

A flat-top allows for leaving your lens standing on the cap, making it much more secure than standing them on a much more narrow bottom lens cap. **Irix Lens** prides itself in slick designs. This is also true for new lens caps. They are not only practical but also look good.

Full protection for your lens

A new **lens cap** is available in a couple of depths, allowing them to fit over wide lenses that might have glass that sticks above the lens like **Irix 11mm T 4.3** and second depth that is designed for all other lenses in the set. A tight push-on design will stay secure on the lens, **protecting the glass** in any situation.

Technical Data

Irix Cine lens front cap	
Surface	Flat-top
Compatible with	Irix Cine lenses
Possibility to put on a lens cap	Yes
Marking on lens cap	Yes

Product series: Irix Product name: Irix Cine Front Lens Cap for Irix 11mm Product code: ICFC-B11 EAN code: 7640172193419	Irix Cine Front Lens Cap for Irix 11mm [ICFC-B11]
