

Gel Filters Set

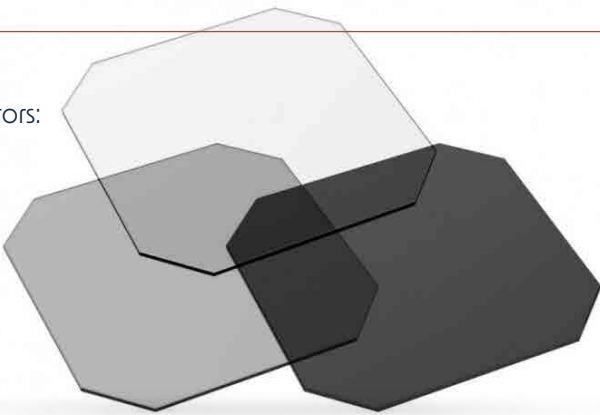

FEATURES

Irix Edge Gel Filter Set consists of fifteen gelatin filters with three density factors: 0.6 (ND4), 0.9 (ND8) and 1.2 (ND16).

Highest quality material.

Top optical quality
They fit into the Irix 11mm and 15mm rear lens mounts, allowing for even more creative photography.

DESCRIPTION

Easy to match

Each filter was made with ultra-thin (0.1mm) high-quality film to keep the image free of optical aberrations and distortions. Thanks to the square shape and rounded corners, the filters easily fit to Irix lenses equipped with rear filter slot size 30 x 30mm.

Unleash your creativity

Irix Edge Gel Filter Set is a convinient option for photographers who want to obtain a longer shutter speed with Irix 11mm f/4.0 or use ND filter with screw-in polarizer on Irix 15mm f/2.4 at the same time.

SPECIFICATIONS

Filter type	Neutral Density (light reduction)
Thickness (mm)	0.1
Dimensions (mm)	29 x 29
	35

DENSITIES

ND4 (0.6)	2 Stops
ND8 (0.9)	3 Stops
ND16 (1.2)	4 Stops
