

Leofoto LVF-163C+BV-15 Video tripod kit

The **Leofoto LVF-163C + BV-15** is a modern video tripod kit designed for filmmakers and content creators working in both field and studio environments. The two-stage leg system with dual-extension design provides enhanced rigidity and load support (up to **8 kg**), while allowing smooth operation across a wide height range—from **38 cm to 172 cm**.

The tripod's **multi-tube carbon fiber legs** deliver excellent torsional resistance and bending strength, making it ideal for use with video cameras, DSLR/DSLM rigs, and streaming setups.

A **mid-level spreader** improves stability on uneven terrain and features adjustable clamps that allow the legs to be drawn inward—raising the bowl height, which is particularly useful when filming at events where a clear line of sight is essential.

Leofoto BV-15 Fluid Head – Affordable & Professional Performance

The **BV-15 fluid video head** combines budget-friendly pricing with serious functionality.

It offers adjustable drag on both pan and tilt axes, ensuring **smooth and controlled motion**—perfect for filming, birdwatching, or any situation requiring precise camera movements.

It features a **flat 70 mm base with a 3/8" mounting thread**, along with **dual bubble levels** (one at the base and one on the camera platform) for accurate leveling.

The **pan handle** can be attached on either side via rosette mounts, allowing for left- or right-handed operation.

Key Features – LVF-163C Tripod

- Lightweight yet rugged **carbon fiber construction**
- Two-stage leg design with secure **flip locks**
- Adjustable **mid-level spreader** for customizable leg angle and improved stability
- Non-slip **rubber feet** for indoor and outdoor use
- **Folded length of just 89 cm** – compact for transport despite full video-size structure

Technical Specifications – LVF-163C Tripod

- **Max working height:** 1720 mm
- **Min working height:** 380 mm
