

Leofoto LY-224C+LH-25(Black) CNC tripod tubes 22/19/16/13MM

The Leofoto LY-224C with LH-25 ball head is a premium tripod kit designed for mobile photographers and filmmakers who value low weight, full functionality, and maximum portability. It's the perfect everyday companion for travel, street, outdoor photography, and vlogging—anywhere space and weight really matter.

Mr. Y Series – Revolutionary Y-Shaped Column Design

Part of Leofoto's innovative **Mr. Y series**, the LY-224C features a unique Y-shaped center column that allows the legs to fold tightly around it.

This results in a significantly slimmer folded profile without compromising stability.

The result? A **folded length of just 480 mm**, making it perfect for travel and backpacking.

An ideal solution for photographers on the move who want lightweight gear without sacrificing functionality.

Light Yet Reliable – 10-Layer Toray Carbon Fiber

The legs are built from **10-layer carbon fiber** from Toray, a leading Japanese manufacturer known for premium composite materials.

The 4-section leg tubes offer excellent stiffness, resistance to torsion, and effective vibration damping.

With this construction, the tripod achieves a **maximum working height of 1420 mm**, while the **minimum working height of just 125 mm** makes it perfect for low-angle and macro shots.

The tripod itself weighs only **750 g**, yet supports up to **6 kg**—ideal for mirrorless cameras, compacts, and lightweight video setups.

Leofoto LH-25 Ball Head – Small Size, Big Performance

The **Leofoto LH-25** is the smallest and lightest ball head in the LH series, designed for use in setups where every gram and millimeter counts.

- **25 mm ball diameter** ensures smooth and precise movement in all directions
- **36 mm panning base** enables fluid 360° panorama shooting
- Made of **anodized aircraft-grade aluminum**, it weighs just **172 g**, yet supports loads up to **6 kg**

- Compatible with the **Arca-Swiss system**

Technical Specifications – Leofoto LY-224C Tripod

- **Max height (with center column & head):** 1410 mm
- **Max height (without center column):** 1200 mm
- **Min working height:** 125 mm
- **Folded length:** 480 mm
- **Leg sections:** 4
- **Max load capacity:** 6 kg
- **Tripod weight:** 750 g
- **Material:** 10-layer Toray carbon fiber

Technical Specifications – Leofoto LH-25 Ball Head

- **Ball diameter:** 25 mm
- **Base diameter (panning):** 36 mm
- **Head height:** 67 mm
- **Mounting thread:** UNC 3/8"-16
- **Max load capacity:** 6 kg
- **Weight:** 172 g
- **Mounting system:** Arca-Swiss (screw-knob clamp)
