

Leofoto NP-50 50mm plate for NB 34 and NB-40

The Leofoto NP-50 is a compact 50mm quick-release plate designed for use with ball heads and tripods that support the Arca-Swiss mounting system. Thanks to its universal dimensions and precision machining, it's an excellent choice for mirrorless cameras, compact DSLRs, and action cameras.

Adjustable Anti-Rotation Stopper

One of the NP-50's standout features is its retractable anti-rotation stopper, which locks the camera firmly in place and prevents unwanted twisting—especially when shooting in portrait orientation or using a longer lens.

This feature enhances frame stability, which is especially beneficial when shooting long exposures or panning.

Premium Build Quality

- Made from aircraft-grade anodized aluminum, offering high resistance to scratches and corrosion
- Lightweight and durable — ideal for everyday use
- Compatible with most Arca-Swiss ball heads and clamps on the market (including Leofoto, Benro, Sirui, RRS, and others)

Technical Specifications – Leofoto NP-50

- **Length:** 50 mm
- **Width:** 44 mm
- **Thickness:** 10 mm
- **Weight:** 38 g
