

Leofoto TFC Tripod replacement foot claws

Leofoto TFC is a set of three durable stainless steel tripod claws designed for use in rugged outdoor conditions. These claws are engineered to dig firmly into soil, rocks, grass, or slippery natural surfaces, ensuring maximum stability and safety for your entire camera setup.

They're a perfect choice for landscape, wildlife, and astrophotographers, as well as any creators working on unstable or uneven terrain.

Maximum Grip with Rock-Solid Construction

- The sharp, precision-machined edges securely anchor tripod legs in place, preventing slipping—even under the weight of heavy gear.
- Made of stainless steel, they offer outstanding resistance to rust, mechanical damage, and harsh weather conditions.
- Each claw is topped with a rubber pad to minimize vibrations and provide extra damping at the connection point with the tripod leg.

Universal Mounting – 3/8" Thread System

Each claw features a standard UNC 3/8"-16 mounting thread, making them compatible with:

- Most Leofoto tripods (LS, LN, LM, MT series, and more),
- Other tripod brands with interchangeable 3/8" threaded feet.

Technical Specifications – Leofoto TFC

- **Length per claw:** 30 mm
- **Mounting thread:** 3/8"-16 (UNC)
- **Set weight (3 pcs):** 144 g
