

Leofoto TFV Rubber foot for Leofoto tripod (3 pieces)

The Leofoto BPL-50 is a compact and exceptionally sturdy quick-release plate designed to meet the Arca-Swiss standard. It enables fast and secure mounting of mirrorless cameras and compact DSLRs to ball heads and other Arca-Swiss compatible clamps. Ideal for photographers looking for a reliable and lightweight solution for everyday use—both in the studio and on location.

Lightweight Yet Durable — Aircraft-Grade Aluminum Construction

The BPL-50 is precision-machined from a single block of lightweight aluminum alloy using CNC technology. This ensures outstanding durability and resistance to mechanical damage while keeping the overall weight to a minimum. Its black anodized finish enhances resistance to scratches and corrosion. Smartly placed cutouts further reduce weight without compromising structural rigidity.

Compact Size, Maximum Stability

The plate measures 50 mm in length, 39 mm in width, and 11 mm in thickness, weighing just 35 grams. These compact dimensions make it a perfect fit for small mirrorless cameras and lightweight DSLRs. The standard 1/4" mounting thread allows quick and hassle-free attachment directly to the camera body.

Angle Scale for Precise Framing

The plate's side edges feature a precise angle scale, allowing accurate positioning on a panoramic head or macro rail. This feature makes it significantly easier to shoot panoramas and product photos that require consistent framing.

Compatible with Leofoto Heads and Clamps

The BPL-50 comes standard with several Leofoto ball heads, including: **LH-30**, **CB-34**, **CB-40**, and clamps such as: **DB-50**, **DM-55**, **DDM-55**.

It is also compatible with all Arca-Swiss standard mounting systems available on the market.

Technical Specifications:

- **Model:** BPL-50
- **Type:** Arca-Swiss Quick-Release Plate
