- Full access to buttons, memory cards and batteries

The Genesis Kit is a solution specifically designed for Panasonic LUMIX GH3, GH4 camera models. Provides protection, stability, convenience of use and the ability to attach additional accessories. The set includes a frame adapted to the shape of the camera, made of anodized aluminum and a handle. The standard equipment of the set is also a mini HDMI adapter - micro HDMI with protection, quick assembly plate, two hot feet on the handle, threaded holes with a universal diameter of 1/4 "and 3/8" and a set of rods with a cross-section of 15 mm. The protection of the HDMI adapter acts on the clamp and prevents spontaneous disconnection or pulling the cable out of the socket, which can lead to equipment damage. It also protects against external disconnection of accessories such as a monitor during operation. The handle ensures the convenience of using the entire set. They are easily removed if necessary. The whole, affecting the comfort of work, is complemented by two rods with a diameter of 15 mm and a quick assembly plate, thanks to which you can easily dismount the camera from a tripod or rig.
