

Adapters for Octadecagon Para Softbox

Quadralite adapters for Octadecagon Para Softboxes were created to use softboxes from the Octadecagon Para series with lamps with Elinchrome and Profoto mounts.

In addition to fastening, they differ in the possibility of mounting the lamp on the modifier:

- front - the lamp is mounted as in an umbrella, reflecting light from the inner part of the softbox
- rear - the adapter is mounted in the back of the modifier.

The most important features of the product:

- various fasteners
- front and rear mountable
- robust construction
- easy to install
