

Dedicated Gobo sets - 6 pcs

Dedicated Gobo sets are light modifiers used to achieve a variety of lighting effects. Thanks to their variety of designs, we can increase the effectivity of our shots in a few moments. Gobos will be especially useful in the studio where the possibilities of creating such effects are very limited and involve the sacrifice of a considerable amount of time. The ease of installation and the result we get thanks to them makes them extremely useful in fashion, product or occasional photography. Dedicated Quadralite Gobos are specially matched to modifiers from various manufacturers.

Quadralite offers 2 different Gobo sets containing 6 different designs each.
