

Quadralite flag diffuser

The diffuser is an additional material for the set of Quadralite flags, regarded as the basic tool for working with lighting on film and photo sets. The coating, as opposed to other surfaces included in the set, transmits light, by dint of it, after placing the flag with a diffuser between the lamp and the object, we are able to soften the light, this allows for an even and natural distribution of light over the object, eliminating harsh shadows and overexposure. The diffuser is available in 4 sizes corresponding to the dimensions of the flags: 45x60cm, 60x75cm, 75x90cm, 120x120cm. The product is additionally secured with strong Velcro which prevents it from sliding off the frame.

Product features:

- 4 sizes - 45x60cm, 60x75cm, 75x90cm, 120x120cm
- High quality fabric resistant for high temperatures
