

Quadralite Flex Foldable Beauty-Dish

Quadralite Flex Foldable Beauty-Dish is a versatile light modifier that combines portability, lightweight construction and high quality materials. It can be used as a beauty-dish to deliver dramatic lighting effect ideal for portrait, beauty and fashion photography. However it can be also transformed into a softbox to achieve soft and diffused light wrapping effect on the subject.

Quick and Portable

Quadralite Flex Foldable Beauty-Dish is built on the basis of a quick folding mechanism, therefore it is easy to use and can be prepared for work in a few seconds. One of the biggest disadvantage of a metal beauty-dish is its stiffness and bulkiness. It cannot be folded down into a bag and is hard to carry around and store. Quadralite Flex Foldable Beauty-Dish is designed to deal with these problems. It is light, small when folded and easy to carry inside the supplied bag.

Versatile

Detachable center diffusion disc is the main reason why this outstanding light modifier is so versatile. This disc is suspended directly above the light source and is working as a deflector that channels the light onto a reflective surface of the shell. In this setup Flex Foldable Beauty-Dish is working just like a traditional metal beauty-dish but without its major drawbacks. However it can be transformed into a full-fledged softbox in a matter of seconds.

Spherical

Thanks to its spherical profile this light modifier is extremely efficient and portable. Especially in tight spaces, rooms and corridors it delivers the light exactly where you want it. If necessary, it can also be used with a grid (available separately) for better light control.

Octagonal

Flex Foldable Beauty-Dish is based on 8-shaft octagonal frame construction, which provides appealing circular catchlights in the subject's eyes.

Fabrics

Outer shell is made from high quality rip-stop nylon fabric for high durability, long lifespan and small weight. Interior is laminated with highly reflective silver film for even light distribution across its surface.

Double diffusion

There are two layers of diffusers made from high quality polyester fabric. This part was carefully picked and tested to ensure proper white balance and color rendition.

Durable

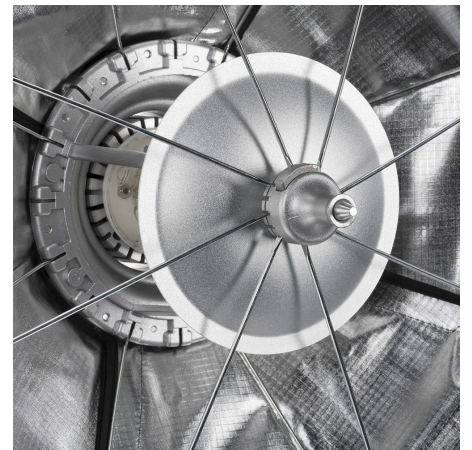

Main part of the frame is made of metal. Steel tension rods support the whole structure effectively and keep spherical shape despite lamp tilt. Mount and deflector are made of aluminum.

Mount

Flex Foldable Beauty-Dish is equipped with widely used Bowens-type mount, which ensures compatibility with wide range of studio and on-location lights available on the market. Thanks to separately available adapters it can also be used with Broncolor, Profoto and Elinchrome flashes.

Quadralite Flex Foldable Beauty-Dish features:

- Available in three variants with different diameter: 65, 85 and 105 cm
- Can be used in two ways: as a beauty dish or softbox
- Octagonal design for circular catchlights – great for portraits, fashion and beauty
- Fast to fold and easy to carry
- Equipped with two, detachable diffusion screens
- Can be used with grids for more contrast and precision lighting
- Handy carrying bag included in the kit
- Heavy-duty all metal frame construction
- Compatible with all lights equipped with Bowens mount (adapters for Profoto, Broncolor and Elinchrome flashes are available separately)
