Product Card

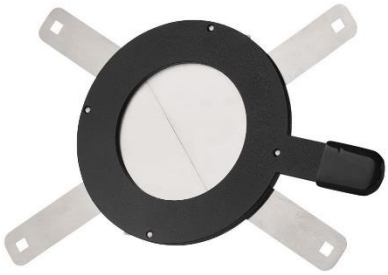

Quadralite Framing Shutters Kit for SN-200LED

A set of four shutters combined into one mechanism, intended for installation in the SN-200LED optical snoot. Shutters allow you to modify the light stream by shaping it into a quadrilateral of any chosen form. Easy operation and wide possibilities allow for creative experiments with lighting. The materials used in the construction guarantee durability and reliability in operation.

Product features:

- Made of steel
- Easy operation
- For optical snoot SN-200LED

Warranty:

- 2 years
