

Quadralite Grid for Hexadecagon 50

This honeycomb is designed especially for Hexadecagon softboxes. This is the simplest and most effective way to limit uncontrolled propagation of light across the photographed scene. Grid is an ideal solution when photographer want to have full control over light or/when more contrast is needed. Grid limits the angle of light propagation to about 40 degrees while not significantly affecting its quality. Thanks to the use of Velcro, it can be easily and quickly attached to softboxes.

Features :

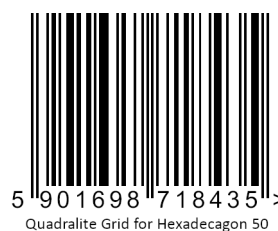

- available in four variants: 50, 90, 120, 150cm
- limits the angle of light propagation to about 40 degrees
- delivers a slight increase in light contrast,
- made of light and durable nylon fabric
- it can be quickly attached thanks to velcro tapes

Specification

Model	Grid for Hexadecagon 50	Grid for Hexadecagon 90	Grid for Hexadecagon 120	Grid for Hexadecagon 150
Product type	Grid for Hexadecagon Softbox			
Light spread	Approx. 40°			
Diameter	50cm	90cm	120cm	150cm
Fabric	Nylon Taffeta
