

Quadralite grid for Octadecagon Para Softbox

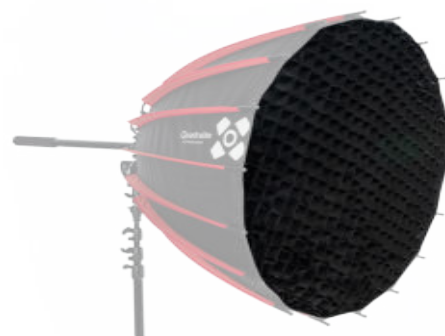

Quadralite grid for Octadecagon Para Softbox is a honeycomb dedicated specifically to the Octadecagon Para line of softboxes. It allows for greater control over the propagation of light over the photographed scene. Grids are ideal where the photographer wants to have full control over the light and where more contrast is needed.

The patch limits the angle of light propagation to approx. 40 degrees without significantly affecting its quality. Thanks to the use of Velcro, it can be easily and quickly mounted to softboxes.

The most important features of the product:

- allows you to narrow the angle of incidence of light from the softbox to approx. 40 degrees,
- causes a slight increase in contrast,
- made of light and durable nylon,
- quick assembly thanks to all Velcro.

Specifications:

Name:	Quadralite grid 90cm for Octadecagon Para Softbox	Quadralite grid 120 cm for Octadecagon Para Softbox	Quadralite grid 140 cm for Octadecagon Para Softbox
Diameter	90 cm	120 cm	140 cm
