

Quadralite holder for 2 and 4 LED SmartStick QLT

These mounts allow you to attach QLT light tubes and work with more than one to illuminate a shooting or film set in a more creative way. It works wherever you need to paint with light or illuminate an object with more than one QLT lamp. They have ball adjustment, and tripod mount that allows you to place a set of lamps at any angle.

Holders for 2 and 4 lamps are used both in the studio and outdoors.
