Product Card

Quadralite L-150 projector lens for Optical Snoots

The Quadralite L-150 projector lens is designed to work with the Canon EF compatible optical snoots. The combination of these accessories allows for precise illumination of objects both on film and photographic sets. The bright f/2.8 aperture helps when working in difficult conditions. Thanks to this, we will obtain satisfactory results even when using lower power lamps. However, metal and glass construction elements are resistant to high temperatures that may arise when working with high-power continuous light..

Product features:

- fast optics – f/2.8
- Canon EF mount
- glass and metal construction

Warranty:

• 2 lata

Specyfikacja:

Model	L-150
Mount	Canon EF
Focal length	150 mm
Aperture	f/2.8
Light cone	16 deg
Focus	manual
Focus range	0,8 m - infinity
Weight	570 g
Dimensions	97 mm length x 69 mm diameter

EAN: 5901698725365
