The Quadralite LED Ring Light is a practical and easy-to-use light source that is perfect for recordings, photography and live transmissions. Thanks to its ring-shaped design, you can place your phone or camera in the centre, which will distribute the light perfectly smooth around the subject.

The Quadralite LED Ring RGB Light has a built-in diffuser which makes the material you create naturally lit (without hard shadows). The colour temperature and light output can be adjusted with a remote control or a controller built into the power cord. For more creative effects, you can use creative modes such as colour wave, or specific colours from the RGB space (such as turquoise, red, magenta, green and others).

Quadralite LED Ring can be powered from any standard USB port (type A), which can be found in laptops, phone chargers and power banks.

Selling Points:

- Easy to use with the built-in controller and wireless remote control
- The soft light emitted by the lamp is perfect for capturing both people and products
- Adjustable light output and colour temperature allows you to match the light to the scene
- Creative lighting modes allow you to show products (or other things) in an interesting way
- Ideal for Skype, zoom, teams and live broadcasts thanks to its compact design and soft, studio-quality light

Najważniejsze cechy produktu:

- Wide RGB spectrum
- Adjustable brightness and colour temperature
- Practical and simple control via remote control or built-in controller
- 26 creative lighting modes such as police light, flowing rainbow, colour wave and RGB mix
- Lightweight and robust lamp design for easy operation
- The included tripod makes it easy to set the light to the recording
- Can be powered from the classic USB connector (type A)

Set includes:

- Quadralite LED Ring Light
- Wireless remote control
- instruction manual

Warranty: 2 years

Technical data:

Product	Quadralite LED Ring Light 8" Quadralite LED Ring Light 10" Quadralite LED Ring Light 12"
Power supply	Standard USB (Type A)
Number of RGB LEDs	48
Frequency of wireless remote control:	RF 433MHz
Range of wireless remote control:	> 12 m
Static brightness control:	eight-level
Dynamic brightness control:	eight-level
RGB mode patterns:	13 dynamic and 13 static
Off mode memory:	When using wireless control, the lamp remembers the last mode, brightness and speed used. This function is unavailable for wired control.
Description of light patterns	1. Smooth rainbow RGB 2. 8-colour wave (red, green, blue, yellow, cyan, purple, white & orange) 3. Green colour chase with orange background 4. Blue colour chase with green background 5. 4-color (red, green, orange & blue) chasing with intermittent white background 6. 4-color flowing in 4 segments (red, green, orange & blue) 7. mixed RGB colors 8. 4-color flowing in 2 segments (red, yellow, white & purple) 9. Police light (quick flash of red & blue) 10. 5-color transition 11. 5-color breathing 12. 1-sided blue tailing with red background 13. 1-sided green tailing with white background 14. Static red 15. Static orange 16. Static yellow

	17. Static army green 18. Static green 19. Static azure 20. Static cyan 21. Static pale blue 22. Static blue 23. Static lavender 24. Static purple 25. Static pink 26. Static white	
Dimensions	Ring Light	Tripod
	• Diameter: 8" / 10" / 12" • Thickness: 2,5cm	• Width after folding 2,7cm • Leg span at the widest point 30.5cm • Maximum tripod height 24cm • Minimum tripod height 13.5cm
Weight of lamp with cable	217g.
