

Quadralite M-9 Flash Holder

Quadralite M-9 is a holder allowing to mount the studio flash to a tripod. Is equipped with universal tripod mount which allows to use it with almost all studio tripods. The assembly of a flash and other accessories is carried out with a spindle which comes with two threaded fittings in 1/4 and 3/8 inch.

The handle features an umbrella mount which enable users to easily and quickly model the flash light generated by the connected flash. The flash's tilt angle and the umbrella may be adjusted.
