

## Quadralite Talia 300 RGB LED

The Quadralite Talia 300 RGB LED panel is a light source designed for creative use in the studio. Its key feature is the full RGB color palette (360°), thanks to which you will be able to approach the topic of your session in a unique way. Thanks to the dedicated diffusion layer, this panel will guarantee you a soft studio light on the recording without the need for additional modifiers.

The light source is LEDs with a high color rendering index CRI>95. The lamp emits a wide beam of strong light, devoid of flickering effect, and all this with the ability to adjust the color temperature of the lamp in the range of 3500-6500K ( $\pm 300$ K) thanks to a dedicated knob located on the back of the panel. This function will allow you to adjust the lamp light to the existing light, thus obtaining a natural effect on your recording. The panel also has 12 modes of operation, which allow for even more creativity in working on the set.

### Product features:

- high brightness of the emitted light,
- high colour deviation coefficient CRI > 95+,
- possibility of smooth color temperature control 3000 K – 6500 K,
- full RGB range,
- passive cooling,
- smooth brightness adjustment,
- small size and weight,
- no flickering effect.

### Set contains:

- Quadralite Talia 300 RGB LED,
- AC adapter.

### Warrianty:

- 2 years

### Technical data:
