

Tripod kit G130 + KK-0S ball-head

The kit comes with:

- ultralight G130 carbon tripod
- KK-0S ball-head
- Textile case

EAN: 6950995006829

Ultralight **G130 Tripod** is the smallest model among Triopo photo tripods. It is made of carbon fiber and belongs to the Travellet group. It means that its legs can be rotated by 180 degrees to reduce the tripod's size for transportation. Legs spacing can be set at 30, 45 and 83 degrees. Their height can be adjusted through twisted bolts equipped with seals to protect the device against sand and dust in difficult outdoor conditions. Tripods have a sliding central column. At its end there is a handle for mounting some additional weight to increase the tripod's stability. Tripods are available with a **KK-0S ball-head**, which is compatible with compact system cameras and light reflex-cameras.

Technical Parameters:

	G130 Tripod	KK-0S Head
	Carbon fiber	Aluminium-magnesium alloy
Number of sections	5	- tripod mount: 3/8",
Maximum height with expanded column (cm)	130	- height: 8,5 cm,
