

Tripod Sirui S-2205-N

Sirui S-2205-N Carbon Fiber Tripod is a complete departure from the old days of "lugging around" a heavy metal tripod. To begin with, it only weighs 2.6 lb and yet can support up to 26.4 lb. The S-2205-N is so versatile in its adjustments that it does about anything you can think of short of bending. It has individual leg spreading capability for low angles or uneven terrain. Besides the standard center column a short center column is included which allows the tripod to squat way down.

Sirui is one of the few manufacturers who make their own carbon fiber leg tubes. The use of 100% carbon fiber and 8 cross pattern layers makes Sirui tripods and monopods capable of supporting impressive load capacities, while providing a lightweight product. In addition to providing high strength and low weight, carbon fiber is also highly resistant to temperature changes, friction (no need for lubrication) and corrosion.

Photographers often work in extreme environments, like blazing deserts or sub-zero mountaintops. It is vital that your equipment works under these conditions. That is why all of these products are "torture-tested" under conditions that far exceed what most people will ever experience: -40 - 212°F (-40 - 100°C).

To confirm the quality and reliability of Sirui tripods (and dedication to details), an independent testing lab (SGS) subjected the leg angle lock spring mechanisms to exhaustive longevity tests. The test reports show that even after 100,000 actuations, the springs continued to perform perfectly.

Short Center Column allows for low angle shooting for unique perspectives and macro photography. The difference in diameter of leg tubes is only 3.0mm from tube to retracted tube. Thanks to precision manufacturing, the legs open and close easily, while the small diameter difference provides added leg stability. To lock the legs of Sirui tripods/monopods, twisting locks are utilized for maximum reliability and stability. Simply twist the rubber leg locks 1/2 turn and the legs will extend by themselves.

The Sirui S-N series tripods have a unique leg position locking system that clicks in place when the tripod is opened. This guarantees that the tripod legs will be properly positioned -providing a rugged, stable support for your equipment. Simply open the tripod in the direction of the arrows until it clicks into place. When you're done shooting, press the red unlock button and close the tripod flat.

All Sirui center columns and legs have keyed, grooved channels that prevent twisting, providing additional stability and safety for your photographic equipment. The detachable leg lets you transform your tripod into a monopod! This reduces the amount of equipment you need to carry and makes your camera bag or backpack lighter.

The set contains:

- Sirui S-2205-N tripod
- short column
- a set of allen keys
- transport bag
- arm strap for the transport bag
- original packaging

Consumer Guarantee:

- 2 years

Load Capacity	12 kg
Numer of sections	5
Max. Tube Diameter	28 cm
Tripod max. Height	137 cm
Minimum Height	17,5 cm
Folded Lenght	46 cm
Material	Carbon fibre
